

SANOVITA

-The first whole food beverage to include Olive leaf extract and pure Olive Oil in a liquid form!

-The first whole food beverage to include pure, concentrated, Oleuropein extract!

Oleuropein is believed to be one of the most powerful antioxidants, which is ten times higher than that of green tea, and two times higher than that of CoQ10.

The first whole food beverage with 7 healing functions!

Q. What are the key functions of SanoVita in the Human Body?

A. SanoVita performs seven key functions to restore the body to its optimal healing state.

- 1 Antioxidant protection** from the phytonutrients and phytochemicals found in many of the fruits and botanicals in SanoVita is possibly the main function of SanoVita. Antioxidants are well known and scientifically studied for their oxidation fighting properties. Oxidation in the human body (also known as “free radical” damage) is linked to disease, inflammation chronic pain and pre-mature aging. Antioxidants has been shown to neutralize the damaging effect of Free-Radicals in the human body.
- 2 Alkazing Chelated Minerals**, most minerals are considered macro-nutrients and are hard for the body to absorb. Chelated Minerals are bonded to an amino-acid to breakdown the mineral into micro-nutrient size which is far more absorbable. The absorption of these minerals can create an alkazing effect in the body system which is more resistant to bacteria, virus and even some disease.
- 3 Enzyme nutrition**, since SanoVita is not high heat pasteurized the natural enzymes in the fruits and botanicals are preserved and “active” providing their intended benefits. Enzymes benefit the digestive system, allowing us to process our food more efficiently and absorb more of the nutrients available in SanoVita and in our diet.
- 4 Fiber**, since SanoVita is a whole food puree from super fruits and botanicals it is therefore a concentrated food in a liquid state. A standard daily amount of SanoVita is equivalent in fiber to 3 to 5 servings of common fruits. Fiber is well known to be both heart and digestive system healthy.
- 5 Anti-pathogenic**, Olive Leaf Extract has been researched and scientifically validated as having antimicrobial, antiviral and antibacterial properties. Olive Leaf Extract has been used for thousands of years to fight off pathogens.
- 6 Plant Based Essential “Healthy” Fats**, the emulsified olive oil contained in SanoVita has omega 3 fatty acids. Research shows strong evidence that the omega 3 fatty acids can help lower triglycerides and blood pressure. There are studies showing that omega 3 fatty acids may help with other conditions, including rheumatoid arthritis, depression, and omega 3 fatty acids are thought to play an important role in reducing inflammation throughout the body.
- 7 Plant Based Collagen**, The Rose Hip found in SanoVita is a source of Plant Based Collagen. Collagen is known to improve cardio health, skin elasticity, hair strength, joint health and bone structure, just to name a few of its benefits.

MANUFACTURING PROCESS COMPARISON

SanoVita	Available brands in the market
Flash sterilized and no chemical preservative	Chemical Preservative
Low temperature puree with active enzymes	High temperature pasteurized sterilization with low active enzyme
Liquid - High absorption rate	Low absorption with capsule powder form
Pureed whole fruit	Extraction
Anti-Oxidant Fruit Blend	Single Ingredient Compound
Pleasant Fruit Taste	Not Known
Ingredients Scientifically Tested	Not Known

SanoVita is produced in the most advanced facility. Each production stage provides perfect quality controlled product to ensure its quality and consistency. Strictly complying with FDA, GMP, CGMP, CGLP, cGD and HACCP guidelines.

INGREDIENT ANALYSIS

SanoVita	Available brands in the market
Seven Nutritional Functions	Generally three or fewer function
Broad Spectrum of ORAC provides wider defense	Unidirectional (or one-way) ORAC
ORAC Value 2,416	Most brands 1,000 or less
Chelated Trace Minerals; Trace Elements	None or a small amount
Plant Based Collagen	Generally none or animal based
Plant Based Omega 3	Generally none or animal based
Peel, Pulp, Seeds, Pit, or Core	Extraction
125% Juice (concentrate or raw juice form)	10% to 100% concentrate

GO **BELLAVITA**

The goal of BellaVita is to create the most nutrient dense product by using the purest ingredients to achieve the most direct effect.
